I didn't work in the same department but I worked in the same building as Connie for over fourteen years. We all impact each others lives in different ways. I'm sorry for your loss, Connie will be missed. Blessings to her family.

Austin,

I am so sorry to hear about your mom. I was out of town the last week and a half and was planning on stopping by this week. Know that you are in my prayers! I will miss visiting with Connie as she always had wonderful stories. She was such a hard worker and cancer never kept her down. I sure hope she isn't working up in heaven!

My sympathies,

Karen Pribnow

Connie was a ray of sunshine and a lightning bolt; all at once.

Her straight forward wisdom will be missed dearly.

My tears and support to the family.

She will always have a spot in my heart.

Connie was my little sister. A pain in the butt sometimes, but I loved her dearly. This is a sad time for Austin and the rest of our family, but we know she is smiling down on us. I am happy that she was able to come to Kansas City to visit with us recently.

She had a lot of good friends, family and co-workers that will miss her. RIP Connie

Connie has always been a fresh breath of air. We never worked in the same unit but she has always guided and helped me through the years since my first day at UNL. My deepest condolences to her son, family, friends and colleagues. She will be dearly missed.
